Dear Sir,

I would like to express my dismay that a proven monopoly such as Microsoft, with a history of manipulation, has been 'let off lightly' by the DoJ and will now be able to effectively carry on with its monopolistic pursuits unhindered.

Microsoft makes a LOT of money from giving people no choice but to run its software, perhaps it is time to let the people have their choice by being able to buy PC's with the software they would like to run, not the software that Microsoft dictates they should run. Here in Europe, computer stores cannot sell PC's without Windows on them as Microsoft does not allow it.

Thankyou

Mat Diss.
